

Summer Intensive Teacher Preparation Program

2017

The NWED summer intensive program presents a collaborative community of learners teaching in a summer school (lab school) setting during the month of July.

Candidates enter the program in the spring, attend an orientation meeting, and complete ten required content modules. They are then assigned to a Professional Learning Community (PLC) to prepare for teaching. From July 5-7, the PLC teams of four arrive at the school to plan together, set up a classroom, and design the lab school experience.

On July 10th students arrive for three hours each morning. Candidates take turns acting as the lead teacher, or as part of the support team. They are guided by a professional education coach who provides feedback about their teaching. Each afternoon, the team refines their plans and prepares for the next day.

The lab school with students ends on July 21st. Candidates then return to debrief and reflect on their experiences from July 24-26th and prepare for the fall.

An additional ten modules are completed before the end of August.

In September, candidates enter full time classroom placements to complete program requirements.

Program timeline:

- Applications accepted: January 1- April 30th
- Applicant selection and notification: May 10th

- Program orientation: June 3rd
- Lab school preparation: July 5-7
- Lab school with students: July 10th- 21st
- Debrief, reflection, and preparation for fall internship: July 24th- 26th
- Candidates enter classroom placement: September
- Expected exit: February 2018*

Endorsement areas for the summer intensive program are elementary and world languages.

Cost:

Elementary only: \$9,900

World Language and Elementary (required): \$11,400

Candidates must have already earned a four-year degree from an accredited college or university to qualify for this program.

*Completion is dependent on the fulfillment of required hours, competencies, reflections, and evaluations.
