Bachelor of Applied Science in Teaching

Do you want to teach children birth through Grade 3?
Do you have an associate degree in ECE?
Do you want to become a certificated teacher?

Informational Meeting Friday, February 24, from 6-7 pm Pierce College Fort Steilacoom Campus Olympic Building, Room 168

Come and learn about this innovative new program designed in collaboration with local school district partners to meet critical shortages in the early childhood education workforce caused by implementation of full-day kindergarten, reduced class sizes in Grades K-3, ECEAP expansion, and increasing educational requirements in early learning programs. The bachelor's degree leads to teacher licensure and two P-3 endorsements: early childhood education and early childhood special education.

Bring with you:

- Transcripts for any colleges and universities attended (unofficial ones are okay)
- Your questions about this new program
- Any friends who might be interested in going through the program with you
